

General Characteristics of IHP-H-277 Series Industrial Specialty Circulator Heads.

The IHP-H-277 24" 30" 277V TPI Industrial Assembled Special Circulator Head is a highly reliable circulator fan that also has a long lifespan. Even better, this circulation head also features a cordless junction box along with the instrument for easy wiring installations.

For added durability, TPI has constructed this circulation head with a steel hub and aluminum spider vanes. Because this is a washdown rated fan head, it also features special zinc-coated steel guards.

With a fan blade size of 24 and 30 inches in diameter, this product packs a punch with a delivery rate of 4,300 and 5,400CFM. This is made possible by a 277V, 1125 RPM horsepower motor that runs on a single-phase system.

This product from TPI's range of specialty industrial circulator heads is also compatible with various mounts and pedestals to increase performance efficiency, including wall mounts, I-beam mounts, ceiling mounts, suspension mounts, pole mounts and even an optional set of wheels for portability.

When it comes to heavy-duty fan heads, no one can go wrong with the IHP-H-277 24" and 30" 277V TPI Industrial Assembled Specialty Circulation Head.

Product Applications of IHP-H-277 Series Industrial Specialty Circulator Heads.

Warehouses, schools, offices, horse barns, patios, playgrounds, restaurants, outdoor activities, shop fronts, outdoor bar areas, events, farms, back-of-house foodservice and other large spaces.
