

General Characteristics of CarbonFilt Carbon Air Circulator Filters & Mounting Rings

The CarbonFilt is a filter used for the Air Management System Air Circulator.
 Used in industrial, commercial or residential areas.
 For indoor and outdoor use.
 Used for ventilation, cooling and drying use, and for after storm damage.
 Designed for keeping areas dust free.
 Superior airflow (235CFM) over filter area.
 Efficient cleaning from 2 stage filter system.
 Traps airborne particles to provide filtered air, removes dust and contaminating particles.
 Provides 2000sq. inches of filtration area to capture particles as small as 5 microns.
 The Rings come in three different sizes 11", 14" and 16" to match with the Air Circulator sizes.
 Three different styles available Polyester, Carbon & Carbon.

Product Applications of CarbonFilt Carbon Air Circulator Filters & Mounting Rings

Recommended for industrial, commercial & residential use.
 For indoor and outdoor use.
 Perfect for use in areas such as schools, hospitals, offices, work stations, factories, gymnasiums and homes.
 Use to remove odor and smoke, or for floor and carpet drying.
 For ventilation, cooling & drying

Warranty of CarbonFilt Carbon Air Circulator Filters & Mounting Rings

Includes Manufacturer's Limited Warranty: None

Specific Characteristics CarbonFilt Carbon Air Circulator Filters & Mounting Rings

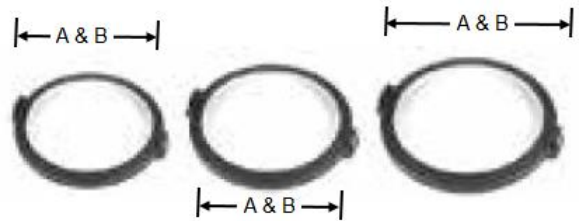

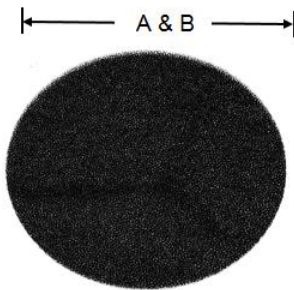

Item#	Manufacturing #	Size Ø(In.)	Description	Filter Type	Weight and Dimensions with Packaging	
					Lbs.	L,W,H In.
