Applications include industrial sites where odor, dust, and humidity control is desired. Misting combined with a proper fan, can provide a high cooling effect.

Applications also include agricultural uses such as green houses, flower shops, gardening warehouses, and mist irrigation.

Mist fans can provide cooling in outdoor areas such as patios and green areas. Its unique design allows for a more uniform distribution of the fog and improved absorption of the moisture.

Entertainment industries apply misting systems for special effects, people cooling, and certain environments where a cool and fresh place is desired.
