

**General Characteristics of PullDry CD35 and CD35P
 Dehumidifiers by Ebac**

VentDepot's PullDry CD35 and CD35P have an adjustable control humidistat to maintain dryness levels.

Integral water container/ bucket & float system.

Hot Gas defrosting feature which automatically melts away frost buildup providing effective operation at low ambient temperatures.

The PullDry CD35 and CD35P have the option for permanent drainage Sturdy carrying handle and rolling castors for ease of mobility.

Totally enclosed coils in epoxy coated, heavy gauge steel case.

Galvanized chassis.

PullDry CD35P – ADDITIONAL CHARACTERISTICS

High capacity internal condensation pump.

Supplied with 25 FT length of hose.

Quick disconnect to reduce setup time

**Product Applications of PullDry CD35 and CD35P
 Dehumidifiers by Ebac**

Ebac CD35 and CD35P dehumidifiers are effective solutions to environmental control problems. The CD range of units are high capacity dehumidifiers, made to operate at high efficiencies by removing moisture from the air through the refrigeration process.

The VentDepot CD35 and CD35P are compact units, are surprisingly quite, yet have the features of many larger models. They are rugged enough for industrial shops and storerooms in addition to for residential use. Their attractive appearance makes them suitable for a home den, basement, or garage applications. The CD35P is a self-contained unit, with an automatic condensation pump; making it the ideal choice for the rental environment or for water damage restoration jobs.

**Warranty of PullDry CD35 and CD35P Dehumidifiers by
 Ebac**

PullDry CD35 and CD35P, by Ebac Dehumidifiers have a 1 year manufacturer's limited warranty.

HOW A DEHUMIDIFIER WORKS

1. Air is drawn into the unit by a fan
2. Air passes over a cold surface
3. As the air is cooled, it's moisture condenses
4. Water falls into the container
5. Air is re-heated by the heat recovery system
6. Air passes back into room 2°C warmer and considerably dryer
7. Defrost system automatically de-ices unit as necessary
8. Unit switches off automatically when container is full
9. When the unit achieves the selected level of dryness it switches off automatically
